# BETTER INSTALLS EVERY TIME

Capture photos – and draw

Pre-populated choices – no typing

Quality Installation Checklist

Does your company suffer from too many unplanned job rollovers? Unscheduled rollover days cost contractors hundreds of dollars.

Worse yet, most rollovers occur during peak season – when the loss of a day means the potential loss of a profitable job – an opportunity cost of thousands of dollars.

The root cause of these events is often a combination of

- **Poor record keeping** – lost paperwork
- **Lack of process control** – missing information
- **Miscommunications** – between sales and operations

Now, Sales Builder Pro customers can add the **Quality Installation Checklist** option to help eliminate these problems – and improve their bottom line.

You'll get three professionally designed checklists – one each for unitary, boilers and ductless – and get **BETTER INSTALLS, EVERY TIME.**

QUALITY INSTALLATION CHECKLIST

AUTOMATIC RECORD KEEPING

Keep Sales Builder Pro proposals and Quality Installation Checklists in one place – *ends lost files and paper shuffling* – automatically.

BETTER PROCESS CONTROL

Checklists leave nothing to chance – *gather everything you need, every time* – get all the data your install team needs.

OPTIMIZE FOR GREATER VALUE

Start with our professionally designed checklists – *unitary, boiler and ductless* – then optimize to the way you work.

JOB SITE PHOTOGRAPHS

Photos document all aspects of the install – *unit placement, line runs and more* – eliminate sales rep to install team miscommunications.

DRAWING TOOL

Drawings show exactly where everything needs to go – *no more guesswork* – for fast, accurate and complete installations.

NO TYPING

Checkbox and dropdown lists eliminate most typing – *get clear, legible, actionable data* – and, all the data you need, every time.

Optimize Checklists For Greater Value

3 **Checklists** – one each for unitary, boilers and ductless. Use as-is or optimize.

Questions – add, delete and modify questions that you need to get every job done right, every time.

Drag-and-drop User Interface – organize the sequence of questions to match your workflow.

Checkbox and Dropdown Lists – if our default answers don't match your needs, simply add, delete or modify answers as you wish.

Job Site Photos – when you face an unusual situation, just add extra photos to document job complexity.
